Product Information

Product Name: Bushbox XL

Model Number: BCE-008 / EAN:4260365160085

Description:

Bushbox XL – The Efficiency Marvel for Great Adventures

The Bushbox XL is our powerhouse for anyone who doesn't want to compromise on cooking performance outdoors. As our second-largest folding stove, it is specially designed for longer expeditions, trekking tours, or cooking in groups. Despite its impressive size when set up, its unique hinge technology allows it to be folded down to a thickness of only approx. 1 cm. This way, it effortlessly disappears into your pack, whether on a motorcycle, in a canoe, or on your backpack.

What's special about the XL version is its enormous efficiency. With just a few small twigs, branches, or cones, you can boil water in no time. The ingenious design optimally utilizes the chimney principle: air flows in from below and generates enormous heat, which is concentrated upwards to your cookware. This makes you completely independent of fossil fuels and allows you to simply use what nature provides on site. The precise hinges are manufactured to ensure they never stick – assembly is done in a flash, even with cold hands or gloves.

In addition to burning wood, the Bushbox XL is a true all-rounder. It serves as perfect wind protection for alcohol stoves like the Trangia or provides a secure base for Esbit and fuel paste. In line with the "Leave No Trace" philosophy, it enables controlled combustion without damaging the ground. Made from 100% stainless steel in Germany, the Bushbox XL is a durable stove for anyone who values quality and functionality.

Your advantages at a glance

- **Large volume, small pack size:** Full performance for several people with a thickness of only approx. 1 cm when folded.
- **Clever hinge technology:** Quick assembly without plugging – the hinges are extremely durable and guaranteed never to stick.

- **Highly efficient combustion:** Optimal utilization of the chimney effect ensures strong heat with minimal fuel consumption.
- **Maximum versatility:** Compatible with wood, charcoal, alcohol burners, Esbit, or fuel paste.
- **Includes Trivets:** The Trivets are directly attached to the stove and also serve as a holder for external burners at three different heights.
- **Versatile extensions:** Compatible with the separately available Universal Grate for grilling. Further accessories can be found here.

Product Details & Technical Specifications

You can find out why the Bushbox XL is a super clever solution and what details make it so unique here. To protect the environment, we deliver the stove in a lightweight cotton bag. For regular use, we recommend our robust outdoor bag or the matching leather bag.

- **Weight:** 765 g (stove) + 64 g (pot supports)
- **Dimensions:** 19 x 12.5 x 1 cm (folded) | 19 x 12.5 x 12.5 cm (set up)
- **Material:** 100% high-quality stainless steel (1 mm material thickness, 1.4301)
- **Origin:** Made in Germany

Frequently Asked Questions (FAQ)

1. What group size is the Bushbox XL suitable for?

Due to its large combustion chamber and stable design, the Bushbox XL offers enough power to easily cook for several people. It also safely supports heavy pots, making it the first choice for families, small groups, or base camps where efficiency and reliability are paramount.

2. What fuels can be used and how is it operated?

The Bushbox XL is extremely flexible: you can classically fuel it with twigs, branches, leaves, or charcoal. Thanks to the variably insertable Trivets, it can also be used at three different heights as a holder and windshield for alcohol stoves (e.g., Trangia). Fuel paste or Esbit tablets can also be used without problems.

3. Is the stove suitable for use in crisis situations?

Absolutely. In emergencies or power outages, the Bushbox XL is a vital resource. Since it can be operated with almost any combustible material from nature, you are completely independent of supply shortages of gas or electricity. Its robustness guarantees reliable function for a lifetime.
