Product Information

Product Name: Bushbox XL Combination Kit

Model Number: BCE-024 / EAN:4260365160245

Description:

Bushbox XL Combination Kit – Your All-in-One System built for big Adventures

The Bushbox XL Combination Kit is the ultimate solution for anyone who prioritizes maximum independence and efficiency in their outdoor endeavors. This set bundles our powerhouse, the Bushbox XL, with the most important accessories to create a perfectly coordinated system. Whether it's an expedition, a longer trekking tour, or family camping – with the included Universal Grate and adjustable Trivets, you are ready for any challenge. Another advantage: The components are significantly cheaper in the set compared to buying them individually.

The core of the set is the Bushbox XL, our proven folding stove for larger projects. Despite its impressive performance, it folds down to only about 1 cm thick thanks to its unique hinge technology. The precise mechanism ensures that the hinges never stick – assembly is done in no time, even with gloves or cold hands. The Bushbox XL optimally utilizes the chimney principle and boils even large quantities of water with minimal fuel consumption.

With this set, you enjoy full flexibility in fuel choice. You can use whatever nature offers: twigs, branches, or cones are burned highly efficiently. At the same time, the stove serves as a stable windshield for spirit burners or as a holder for Esbit and fuel paste. In line with the "Leave No Trace" philosophy, the system allows controlled combustion without damaging the ground. Made from 100% stainless steel in Germany, this set is an investment in quality and reliability for your future experiences.

Your advantages at a glance

- **Complete Set:** Includes the Bushbox XL, a pair of Trivets, the Universal Grate, and a robust Outdoor Bag at a preferential price.
- **Clever Hinge Technology:** Quick assembly without insertion – the hinges are extremely durable and

guaranteed never to stick.
- **Versatile Grilling & Cooking Options:** The included Universal Grate serves as a grilling surface or a perfect base for spirit stoves and the use of wood pellets.
- **Independent Fueling:** Works with wood, charcoal, spirit burners (e.g., Trangia), Esbit, or fuel paste.
- **Clean Storage:** The high-quality canvas bag with separate inner compartments keeps everything neatly stored and can be easily attached to a belt or backpack.
- **Various Extensions:** The system is thoughtfully designed down to the smallest detail. Further accessories can be found here.

Product Details & Technical Data

To find out why the Bushbox XL is a super clever solution and how its components simplify your outdoor life, click here. The products in the set are perfectly coordinated and offer you maximum performance with the smallest possible packing size.

- **Material:** 100 % high-quality stainless steel (1 mm material thickness, 1.4301)
- **Outdoor Bag:** Durable canvas fabric (100 % cotton) with belt loop and D-ring
- **Origin:** Made in Germany (stove, Universal Grate & Trivets)

Frequently Asked Questions (FAQ)

1. What group size is the Bushbox XL Combination Kit suitable for?

Due to its large combustion chamber and stable construction, the Bushbox XL offers enough power to easily cook for 3-4 people. It also safely supports heavy pots, making it the first choice for families, small groups, or base camps where efficiency and reliability are paramount.

2. What advantages does the included Universal Grate offer?

The Universal Grate makes your set a true multi-tool: It serves as a grill grate, a stable surface for small cups, or – when inserted at half height – a perfect base for spirit stoves or wood pellets. In the middle position, it allows for a constant temperature over a long period with low fuel consumption.

3. Is the stove suitable for use in crisis situations?

Absolutely. In emergencies or power outages, the Bushbox XL is a vital resource. Since it can be operated with almost any combustible material from nature, you are completely independent of supply shortages for gas or electricity. Its robustness guarantees reliable function for a lifetime.
