The „Trivets (Set) Bushbox LF“ in detail

- Inserted on top of the Bushbox LF or Bushbox LF Titanium, the stainless steel Trivets ensure safe standing even for smaller cups and cooking vessels.
- Various notches allow for the Trivets to be inserted in different positions as required and ensure sufficient air supply between flame and cookware.
- You can use the Trivets to position an external heat source (e.g. Trangia) in two different positions in the Bushbox LF or Bushbox LF Titanium.
