Description

With the Bushbox Windshield in your backpack, nothing stands in the way of a cosy fire and a warming drink. Even in wind and weather, you can cook and light a fire just as usual.

The “Bushbox Windshield“ in detail

- The Windshield offers the possibility of maintaining a fire and cooking outdoors in all weather conditions.
- It helps conserve fuel by channelling the flame directly onto your cookware with almost no heat loss.
- It’s not just a windshield: it also serves as a heat reflector and a dry base for tinder when you’re on the move.
- The Bushbox Windshield comprises 3 pieces and is equipped with the same unique, high-quality hinge mechanism as our Bushboxes. This makes it easy to set up and fold again - even if something spills while cooking.

- Compact, lightweight and foldable – the perfect fit for any backpack.
