Frequently Asked Questions (FAQ)

1. On which stoves and heat sources can I use the Bushbox Mug?

The Bushbox Mug is a true all-rounder. You can use it flexibly on all types of stoves and cookers. It works great on your Bushbox, on classic gas cookers, on the grill grate, and by the campfire to heat water.

2. What should I particularly consider when using the enamel mug?

With proper handling, enamel is extremely resistant to external influences. However, you should avoid hard knocks and drops on stone floors to prevent chipping of the enamel. Always ensure slow and even heating of the mug. After use, preferably clean it with hot or warm water – sudden contact with very cold water can damage the heated glass layer due to thermal shock.

3. How do I clean the enamel mug on the go and at home?

On the go, thanks to its smooth, glass-like surface, the mug is extremely easy to clean thoroughly with warm water. At home, you can easily clean it with standard dish soap or put it in the dishwasher. It is important to dry the mug

quickly afterward – especially under the drinking rim – to avoid moisture accumulation.
