Description

Have you ever been out and about in nature and fancied a nice hot coffee? Unfortunately, you don't have a lighter with you, or your tinder is damp from the weather. With our Bushbox Fire Sticks, starting a fire will be easy from now on, they are tinder and fuel all in one! They are easy to light with a fire steel or other lighter and burn long and hot enough to start a fire even in the rain or snow, or to heat a drink on one of our smaller stoves.

The “Bushbox Fire Sticks” in detail

- The Bushbox Fire Sticks are the perfect tinder for use with a fire steel.
- There are 5 Bushbox Fire Sticks in the set. Each stick can also be divided into 4 smaller strands if needed, so 20 strands in total.
- Simply ignite with a fire steel or other lighter and you immediately get a hot, very long burning flame.

- The sticks can be blown out and used again and again until they are completely used up.
- The Bushbox Fire Sticks are completely waterproof and burn even when wet.
- Perfect for your EDC kit.
- The sticks are suitable for safe, smell-free and clean lighting of your Bushbox, grill or even your stove and fireplace.
- Also suitable as a long-burning candle, fuel substitute or source of heat in an emergency situation.
